

Project:

Fonterra Milk Processing Plant

Location:

*Takanini, Auckland
Reporoa Waikato*

Project completed:

2011

Applicator/Contractor:

*Topcoat Specialist Coatings
Limited*

Market sector:

Flooring

Products used & amounts:

Ucrete DP

Fonterra Milk Processing Plant

Ucrete DP – Choice for New Zealand Milk Processor

Ucrete DP floor in the Tanker Reception Bay

The background

Located in Takanini, Auckland and Reporoa, Waikato, the plants are owned by global leader in dairy nutrition, Fonterra Co-operative Group. One of the top ten dairy companies in the world, Fonterra collects over 14 billion liters of milk a year from New Zealand farms and sells more than 2.3 million tons of product to customers in more than 140 countries across the globe.

The challenge

The combination of heavy traffic (both foot and equipment) and harsh operating conditions, combined with the strict hygiene standards and punishing cleaning regime, requires a floor which is extremely hard wearing; resistant to a wide range of materials; able to withstand constant temperature cycling; easy to clean; and has a safe, slip-resistant surface.

Fonterra Milk Processing Plant

Ucrete DP – Choice for New Zealand Milk Processor

Installing one of the new Ucrete DP floors in Fonterra's newly expanded Takanini Plant

Applying the non-slip aggregate

Our solution

Applying the non-slip aggregateThe first of the new Ucrete DP floors was laid in a newly expanded processing area at Fonterra's Yoghurt, Cheese and UHT plant in Takanini, whilst the second floor was included as part of the refurbishment works in one of the Takanini plant's packaging areas.

The contract for the new Ucrete DP floors and preparatory works was awarded to Topcoat Specialist Coatings Ltd. Encompassing a total area of approximately 500m², the Takanini floors were Fonterra's first Ucrete DP floors, and as such, these sections were also used by the company as a 'live trial' to assess the product's performance under actual operating conditions.

The success of the first two floors at the Takanini plant resulted in Fonterra installing a subsequent Ucrete DP floor in a section of its Reporoa plant. Encompassing an area of some 700m², the Ucrete DP floor in the Tanker Reception Bay incorporated a specially hardened non-slip aggregate to provide maximum slip-resistance and extreme wear resistance to cater for the high levels of heavy vehicle traffic.

The customer's benefit

- Ucrete DP provides outstanding performance in demanding conditions
- Able to be used as a "live trial" to assess products performance
- Available in a range of colors
- Able to be used for new floors as well as refurbishment works

Projects facts at a glance

- Approximately 500m² Ucrete DP flooring laid in a newly expanded processing area and as part of the refurbishment works in Takanini plant.
- Approximately 700m² Ucrete DP flooring laid in Reporoa plant in the Tanker Reception Bay incorporated a specially hardened non-slip aggregate.
- Ucrete DP is easy to clean; and has a safe, slip-resistant surface.

Master Builders Solutions by MBCC Group

The Master Builders Solutions brand brings all of our expertise together to create chemical solutions for new construction, maintenance, repair and renovation of structures.

Master Builders Solutions is built on the experience gained from more than a century in the construction industry. The know-how and experience of a global community of construction experts form the core of Master Builders Solutions. We combine the right elements from our portfolio to solve your specific construction challenges.
