Cranswick Foods, Hull Fast-cure flooring solution for butchery area

Our reference in Hull (United Kingdom): Cranswick Foods

## The background

Cranswick Foods supplied fresh and processed food to the UK food retail, food manufacturing and food service sectors, focusing on high-quality fresh pork, gourmet sausages, premium cooked meats, traditional air-dried bacon, charcuterie and sandwiches.

This flooring refurbishment project in the butchery area of Cranswick Foods' Hull facility involved the removal of existing finishes, drying the slab, mechanically preparing it, priming with Ucrete PSC and then overlaying with 9 mm of Ucrete UD200.

## The challenge

The pressure was on as the butchery area had a very short window of time for the refurbishment work to take place. All activity needed to be carried out within approximately 14 hours, from Saturday at 5pm until 7am the following morning: this entailed flooring removal, preparation of existing slab and the installation of $180 \mathrm{~m}^{2}$ of Ucrete UD200 for a fast return to traffic.

## Redditch Office:

Master Builders Solutions UK Ltd 19 Broad Ground Road, Lakeside, Redditch, Worcestershire, B98 8YP, United Kingdom

## Cranswick Foods

## Fast-cure flooring for butchery area

## Our solution

Flooring contractor GRF knew the site and working conditions very well, having established a good relationship with Cranswick Foods' engineering manager. After discussions with Master Builders Solutions, GRF was confident that it could remove any existing finishes using its own equipment, then dry and prepare the butchery area before installing the Ucrete PSC and Ucrete UD200 fast flooring system at 9 mm .

With a 14-hour window GRF was able to remove the existing floor in around three hours, dry and then prime the concrete slab with Ucrete PSC then allow to cure for three hours. Once the primer had cured, GRF team then applied Ucrete UD200 within two hours and allowed it to cure for six hours at approximately $10^{\circ} \mathrm{C}$. Cranswick Foods' cleaning crew was able to return to the butchery area and commence cleaning in time for production to resume.

## Benefits to the customer

- Cranswick Foods' engineering manager was very pleased as he had an excellent working relationship with HRF, coupled with a belief in the superior performance of Ucrete flooring materials.
- Recognising that there was a problem in the butchery area, nevertheless Cranswick Foods did not have the time to close one of its vital production areas - the system specified allowed the area to be returned to service without impacting on production.
- A fast-curing system with all the performance benefits of Ucrete applied by a skilled and knowledgeable applicator was the perfect solution.

Our reference in Hull (United Kingdom): Cranswick Foods

## Projects facts at a glance

- Production had to remain uninterrupted
- Over $700 \mathrm{~m}^{2}$ of Ucrete UD200 installed in total
- Area was returned to service within a 14-hour window

## Master Builders Solutions by MBCC Group

The Master Builders Solutions brand expresses MBCC Group's expertise in providing customized chemical solutions for new construction, maintenance, repair and restoration of structures.

Master Builders Solutions is built on the experience gained from more than a century in the construction industry. At the core of the Master Builders Solutions brand is the combined know-how and experience of a global community of construction experts, who connect with you to solve all of your construction challenges.
